Due Date: Friday Mar 15, 2019 (11:59PM)

Overview (10 points)

Each member of the group is required to submit an individual document. The individual document is a half-page to 1-page reflection of the lessons learned from the project experience. These lessons can be with respect to the development of SQL queries, database design, web design, teamwork, among others. The following is a list of questions that might assist you in writing this document. The grade will be based on your **thoughtfulness** and **insight** of your answers.

- Do you think you could have done this project by yourself?
- What did you learn from this project?
- Which part of the project you believe worked well?
- Which part of the project you believe did not work well?
- In your next similar project, what would you consider doing differently?
- What ideas taught in class you believe were useful to this project, and why?
- What ideas taught in class you believe were not useful to this project, and why?
- What recommendations do you have for future TCSS445 students?
- Did this project help improve your understanding of the database design process? Why or Why not?
- Has the project helped you improve your confidence about the building databases? Why or Why not?

Rubric:

- *Thoughtfulness (4 marks)*
  - *self-reflection present some thoughts and effort*
  - *learning experience is relevant and meaningful to student and course learning goals*
- *Analysis/Insight (6 marks)*
  - *self-reflection provide more than a simple description of the experience*
  - *self-reflection describes to some extent how the learning experience contributed to student understanding of*
    - *self*
    - *other students (e.g. team work)*
    - *real-world scenarios*
    - *course concepts*
